

Lead-Free SD

Drinking water is free of lead when it leaves the water treatment plant—however, water can absorb lead if it travels through lead pipes on its way to your faucet. The majority of South Dakota water pipes are free of lead, but we need to find where lead pipes still exist so they can be removed.

Visit sdwaterpipes.com for more information.

HEY ADULTS, if you own a home or business served by a public water system, your water provider needs your help. Please scan this QR code with your smart phone to take a quick five minute survey. Help solve the mystery of your water service pipe material.

Open the camera app on your smartphone, hover over the QR code to the right, and tap the link to get to the survey.
